History
Founded in 1977, Solcon Industries Ltd. is a dynamic high-tech electronics company. For almost 30 years we have been at the forefront of design, development and manufacturing of industrial electronic systems, primarily intended for installation in low and medium voltage AC Motor switchgear.

We utilize advanced technology with leading edge designs based on continuous field research, test and development. While implementing design criterions that offer the highest long-term reliability available in today’s market, we provide future focused innovative solutions as a fast response to our customers’ needs. These advantages contribute to maintaining the Company’s position as the avant-garde of the power electronics industrial and marine markets.

Brand labelling partnerships with multi-national companies are influential in opening/creating exclusive marketing channels. These channels contribute to the global introduction of Solcons’ innovative solutions. The company provides its partners with a vast experience derived from a variety of over 50,000 installations in Industrial, Marine, Offshore, Oil and Gas Applications. Our unique solutions are applied worldwide and constitute the basis for outlining successful designs with cost-effective results.

Product Lines
* Soft-starters – Comprehensive line, up to 3 MW in Low Voltage and 50 MW in Medium Voltage (15KV).
* Motor Protection and Control Relays for AC asynchronous motors.
* Thyristor Power Controller – phase control or zero crossing temperature (voltage) controllers up to 1000V / 2700A
* Control systems - for electrical automation including ; Power Meters, Capacitor Controllers, Generator control/protection systems and Restarting Relays.
* Cathode Protection System – Fully digital up to 250A, and miniature analogue, Current, Voltage or Power based for gas stations.

Solcon is accredited with ISO 9001:2000. Our product lines meet prevailing international standards such as CE, UL, cUL, CCC and Gost-R. Some of our digital soft starters are type approved for marine, naval, oil, gas and offshore applications by Lloyds Register, Germanischer Lloyds, DNV, RINA and Mil-Std environmental tests (BV, ABS and others are also available).

Manufacturing Facility
The Solcon manufacturing complex (picture above), comprising of about 4000 m² and located in the Yokneam Industrial Park east of Haifa. Solcon employs 145 professionals dedicated to the development, production, sales and marketing of over 60 products in over 65 countries world wide. Our network of highly trained distributors insures local support within each country.
