

Rescue device for emergency situation

After natural disasters such as typhoons and earthquakes, rescuers face many challenges.

Pat Jack has been developed after many experiments to solve one of the greatest challenges, that of raising masonry or building materials to free victims of the disaster. The Pat Jack is perfect for emergency situations, light weight, portable, simple inflation and most importantly it is safe.

Merit 1

Can be inflated using a bicycle pump

Merit 2

Light weight

Merit 3

Thickness 19mm

Merit 4

Flexibility

Merit 5

Safety

Pat Jack line-up

Set A (Pressure 7bar)

Set B (Pressure 3bar)

Pat Jack set

Set A (Pressure 7bar)

Pat Jack (A24-30/A24-60)
Connecting stop valve
Pumping hose
Adaptor
Protect cover
Box

Set B (Pressure 3bar)

Pat Jack (B24-30/B24-60)
Connecting stop valve
Pumping hose
Adaptor
Protect cover
Box

Portable Air Tube JACK
