ALUMINIUM PROFILES

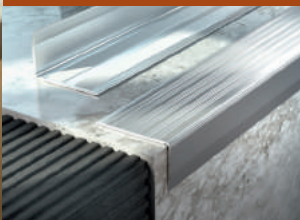

ALUMINIUM PROFILES

NOSING PROFILE S05

A broadly grooved profile provides the aesthetic appearance and safety of use. A bevelled shape of vertical profile additionally protects users against tripping.

TRANSITION PROFILE S10

A classic arched profile is fastened with a special system of pegs, invisible from the outside. It provides the exceptionally aesthetic appearance.

TRANSITION PROFILE S11

It is a wide profile of a rounded shape. It perfectly masks even considerable irregularities of joined floors. Invisible pegs provide the aesthetic appearance of this profile.

TRANSITION PROFILE S12

It is a wide, flat and very low profile which joins floors that are at the same levels, with no threshold left. It perfectly masks even wide dilatations.
