**RUBBER FLOORING  
FOR FITNESS AND GYMS**

## RESILIENT RUBBER FLOORING FOR FITNESS AND GYMS

Sizes available for tiles: 0,5x0,5 m; 0,5x1 m; 1x1 m; thickness: 15–100 mm; edge and corner elements available in size of 0,5x0,5 m

### RUBBER SAFETY TILES

RUBRIG is producing high density rubber tiles with impact reducing pads for free weight zones. These tiles are connected with pins which are engineered to keep the tiles together even in hardest conditions. Our tiles are crack free, oil and petrol resistant, water and frost proof.

We use our own innovated RUBRIG tiles bottom cushioned construction that ensures high level of shock-absorbance resulting in NO Damages to floor in cross fit halls.

#### We have several product versions:

- **Basic Version** – black recycled SBR rubber +colored SBR top in red, green, blue and grey, bounded by MDI polyurethane binder.
- **Virgin EPDM Rubber Version** – black recycled SBR rubber base, covered with a EPDM rubber available in 24 colors top layer, bounded by a clear MDI polyurethane binder.
- **Design Version** – design patterns applied on any Basic or Virgin EPDM rubber version.
- **Custom made Version** – design patterns according to customer wishes and drawings (minimum order size applicable).

### PUZZLE-LOCK RUBBER MATS

RUBRIG is producing light-weight and easy-to-assembly type of safety indoor tiles suitable for almost any kind of base and finished floors.

These modular floor tiles are made for use in fitness gyms, equine and agility halls.

RUBRIG fitness flooring products are made according to the highest industry standards and are CE marked.

Our products have passed VOC test according to AgBB and have high slip resistance in wet areas being tested as C class (DIN 51097). Fire resistance for EPDM are classified as Dfl -s1, but for SBR puzzle-mats as Efl -s1 class (EN 13501-1).

Sizes available: 1,03x1,03 m, area size 1,06 m<sup>2</sup>; thickness: 15–40 mm; edge elements in size of ½ from mat and corner piece (¼ of mat) available

## DESIGN PATTERNS FOR MODERN INTERIOR SOLUTIONS

RUBRIG is offering four authentic design patterns allowing interiorists successfully integrate resilient flooring into common design concepts of modern sport and fitness objects

#### CRACKED EARTH

The cracked earth pattern will always remind of its extraordinary beauty. It is the backbone of everything and something we want to protect ... We are used to walk on earth; we are ready to touch it with bare feet. Such pattern could appear on clay soil dried from the inside being close to a flame or heated lava.

#### SUN TREE

Ethnic symbol of continuous growth. The symbol of understanding of the past, the present and the future. The knowledge of our ancestors, of ourselves, of our children. It is a young twig just beginning to grow. A traditional Latvian pattern, a part of a carefully protected cultural tradition.

#### VIEWPOINT

Saturated geometry, the accuracy of interlocking lines rhythmically curving around the centre creating an optical illusion. Viewpoint is an extension of urban human in city space. Dynamics and optical effect generating by this pattern will decorate the objects in Art Nouveau style, sports, children's and concert venues, amusement parks.

#### WAVE

A trace of a wave in the sand, a pattern of sea-bed along the plunge line, memory of a breeze, a trace of wind and joy of a holiday – all of this is rendered in the optical effect of this pattern thanks to which a special mood is tailored thereby rendering emotion to the most technocratic environment. Wave pattern is a fresh solution for open areas and terraces in the coastal areas.
