FOR ADJUSTABLE SUPPORTS

EXTENSIONS

FOR JACK SUPPORTS

FROM 25 TO 250 MM

The brand new Impertek's extensions increase the versatility of Jack Supports, enabling an extension from 35 up to 250 mm.

20 and 30 MM STACKABLE

The 20 mm extension for the 50/70 and the 30 mm to be used starting from the 65/100 are also stackable, increasing the excursion and the ease of use.

EASY-KEY KEY

MULTIFUNCTIONAL

EASY

Can be used with the floor already laid leveraging and lightening the adjustment.

ACCURATE

Makes easier the millimetrical adjustment of the nut easier.

MULTIFUNCTIONAL

It serves to ease the extraction of the headpiece and to unlock the screw when inserting the extension P04.

EASY-FLAT

PERFECT FLATNESS

ALWAYS ON AXIS

Enables an accurate and easy slope compensation keeping the support always on an axis of 90° in respect to the floor.

UNIFORM LOAD

Enables an uniform load distribution on the support eliminating the Pisa tower effect – not indicated with higher heights and with a considerable slope.

the right support

SUPPORTS FOR FLOORINGS

QUALITY / TECHNOLOGY / PRODUCTION
MADE IN ITALY

A versatile and complete system to definitely resolve in easy way and without demolitions all the problems of outside floors.

A complete series of solutions able to suit for the greatest part of the present situations in the construction site - also in case of restructuring.

Our supports enable to choose the best solution according to the type of floor to

lay: that is wood, composite wood, ceramic, marble or granite.

Production automation which ensures maximum quality control, elasticity and personalization of products and careful selection of suppliers of raw materials for innovative products, are the company's new targets that enable the continuous and constant improvement of our supports.

5 GOOD REASONS TO CHOOSE OUR SYSTEM

ALL ADVANTAGES OF A VERSATILE SYSTEM

Our supports are designed to create external paving with high yield in terms of strength and durability.

Ideal for terraces, pool surrounds, walkways on roofs and hanging gardens, can be laid

directly on the old pavement. The advantage is huge in terms of construction costs and delivery times and any repairs to the waterproofing system are possible without demolition.

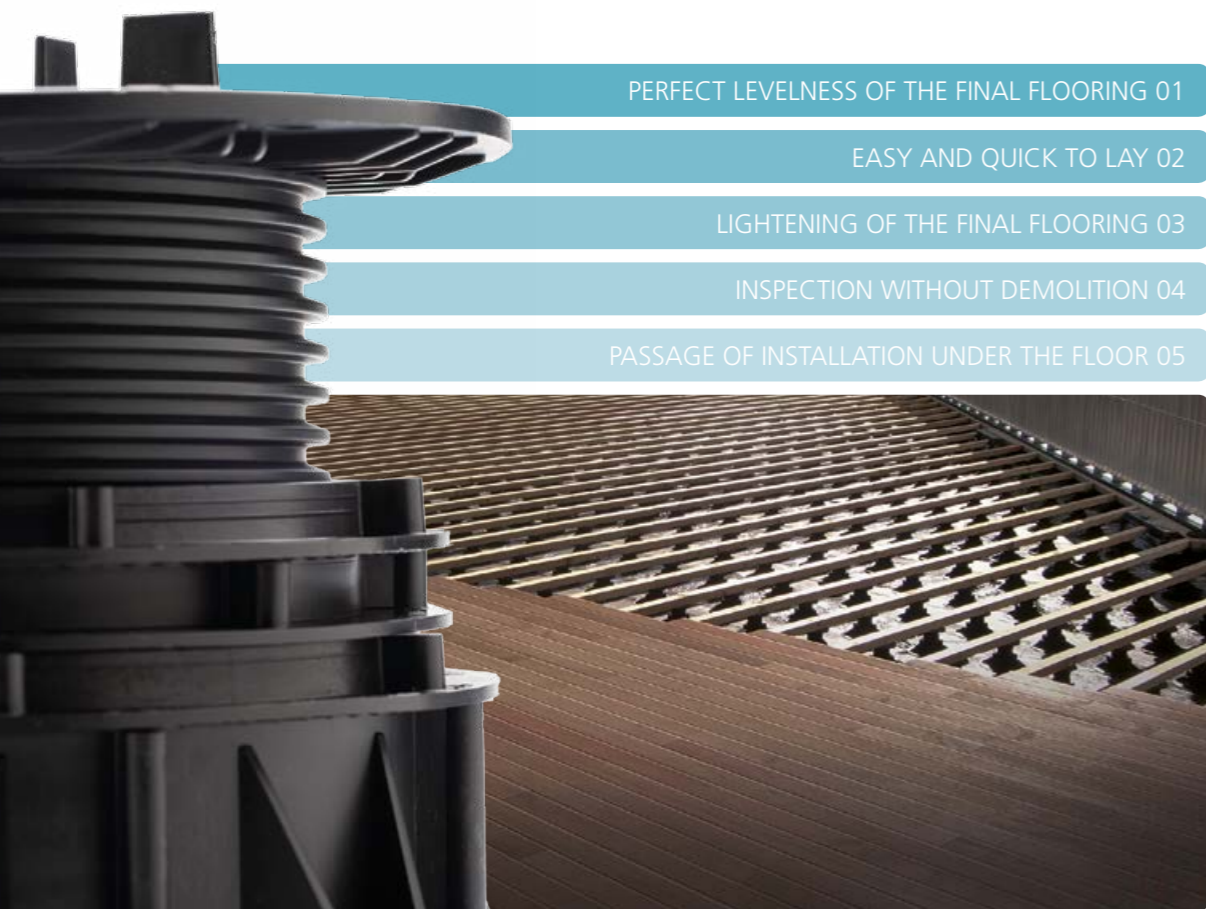

PERFECT LEVELNESS OF THE FINAL FLOORING 01

EASY AND QUICK TO LAY 02

LIGHTENING OF THE FINAL FLOORING 03

INSPECTION WITHOUT DEMOLITION 04

PASSAGE OF INSTALLATION UNDER THE FLOOR 05

FIXED SUPPORTS

FIXED HEIGHT SUPPORTS

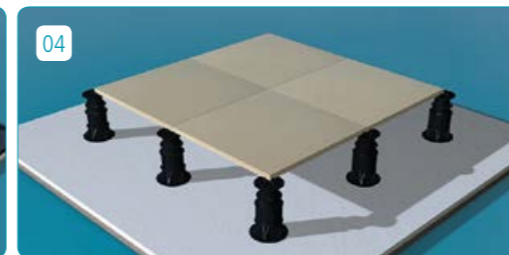

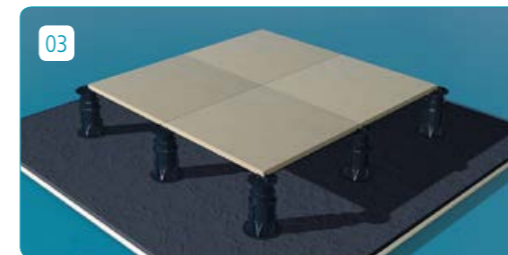

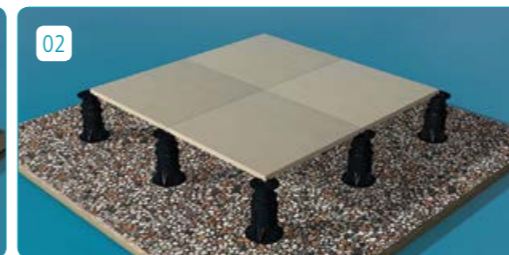

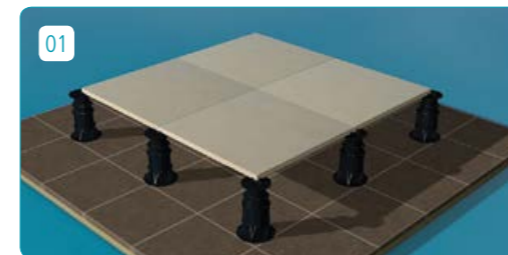

The **FIXED SUPPORTS** are used to cover minimum quotas, and when the characteristics of the terrace don't allow greater heights as, for example, when the threshold of the door is very low.

FIXED HEIGHT SUPPORTS

MINI-ELASTIC

Both the fixed height supports system and adjustable heights, they allow ample coverage of heights. The use of levelers and extensions enrich the range, optimizing at best all pieces in the warehouse.

APPLICATION OF FIXED HEIGHT AND ADJUSTABLE SUPPORTS

- 01 Laying on pre-existing floor
- 02 Laying on stabilized gravel
- 03 Laying on bituminous membrane
- 04 Laying on liquid waterproofing - synthetic felts
- 05 Laying for fountains and waterworks

FIXED HEIGHT SUPPORTS

ELASTIC SUPPORT

H from 5 to 14 mm

Load capacity 1000 kg/piece

FIXED HEIGHT SUPPORTS

H from 12 to 19 mm

Load capacity 1000 kg/piece

ADJUSTABLE SUPPORTS

MINIMART

H from 22 to 37 mm

Load capacity 400 kg/piece

JACK SUPPORTS

H from 35 to 365 mm

Load capacity 400 kg/piece

XL JACK SUPPORT

H from 85 to 380 mm

Load capacity 400 kg/piece

MEGAMART S

H from 121 to 571 mm

Load capacity 800 kg/piece

MEGAMART

H from 35 to 1020 mm

Load capacity 800 kg/piece

ADJUSTABLE SUPPORTS

ADJUSTABLE HEIGHT SUPPORTS

Adjustable supports enable a perfect flatness of the final floor.

The laying is easy, fast and the final result is a lightened floor, compared with the traditional laying enabling always inspections and repairing without demolitions.

The millimetrical adjustment of the final height ensures a spirit-level proof result. The system is compatible with many types of floorings: gres tiles, prefabricated concrete slabs, natural stones, granite, timber and composite wood.
