

YARN TENSIONERS

Not every yarn needs the same tensioner, please find our most popular tensioners below:

SPRING TENSIONER

Tension adjustable by winding up or relaxing the spring.

Variation on this type of tensioner on request.

CROCODILE TENSIONER

Tension adjustable by turning the wheel from 0 to 9.

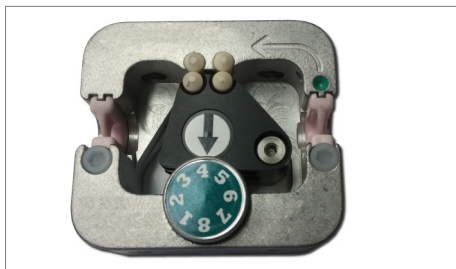

Mostly used in cabling, but also suitable for carpet creels.

BALL TENSIONER

Tension adjustable by adding or removing metal balls to or from the tensioner.

Variations on this type of tensioner on request.

SMART TENSIONER

Tension adjustable by turning the wheel from 1 to 8.

MAGNETIC BRAKE

Tension adjustable by turning the wheel.

Mostly used in cabling for stabilising the balloon. Can also be used in different applications.

FRICTION TENSIONER

By turning the disc, the yarn is wrapped around the base, adjusting the tension.

Please contact us for your individual needs.

More types of tensioners on request.
