made with ultra-light 2-layer

Reflexcell[™]
TECHNOLOGY

cells trap air
elastic hugs body
metal coating reflects heat

The EMS blanket has been specifically created for the emergency services. Manufactured from 2 layer Reflexcell[™] expanding metallised OPP film. Designed to prevent loss of body heat, elasticsation hugs the body, cells trap air giving the EMS blanket unrivalled thermal qualities. The EMS blanket wraps around the casualty and a re-usable self-adhesive strip allows easy access. The EMS blanket is lightweight (approx. 242g), compact yet very robust.

BLIZZARD products are extensively used by the military and emergency services worldwide.
