

Dräger HPS 7000 Firefighter's helmet

The Dräger HPS 7000 firefighter's helmet is in a class of its own, thanks to its innovative, sporty and dynamic design, ergonomic fit and components which make it a multifunctional system solution. It provides optimum protection during every operation.

TAILOR-MADE FIT FOR EVERY HEAD

To meet this requirement, Dräger developed the HPS 7000 in close cooperation with customers worldwide. Two helmet shells for head sizes from 50 to 66 cm cover a wide range of individual head and face shapes. With a weight of approx. 1,380 g in the basic version, it is one of the lightest helmets in its class. In addition to its comfortable interior fitting made of skin-friendly, anti-allergic and flexible materials, the Dräger HPS 7000 stands out with its high level of operating and wearing comfort.

COMFORT IS A MATTER OF POSITION

The padded 4-point harness allows for safe and easy adjustment to any head shape. The optimum balance of the helmet can be adjusted individually in the neck and chin area. The padding made of Nomex® also ensures a comfortable fit. The integrated comfort hairnet enables the height to be adjusted and assures a good climate inside the helmet. During operation, the head size can be adjusted quickly via an easy-to-operate size-adjustment wheel with a safety mechanism on the outer shell, even with wet and thick gloves.

DESIGN AT ITS STRONGEST

The ergonomic helmet design evenly distributes the weight to the head and relieves the neck muscles. The large and modern facial protection visor offers unrestricted protection with best visibility. For operations under chemical protective suits, the visor can be fixed permanently. A safe alternative is provided by the integrated and individually adjustable protective goggles with an integrated soft-pad edge protection. Both visors leave enough space for the simultaneous use of corrective glasses or respiratory masks. A firefighter's helmet is more than a mere piece of equipment – it serves as a personal distinguishing feature. Therefore, you can configure the helmet according to your wishes: select from a variety of colours and also pick an individual emblem for your front plate.

Dräger HPS 7000
Basic version with facial protection visor

INNOVATIVE SYSTEM DESIGN

As a provider of integrated system solutions, Dräger sets new standards for the interaction of its products. The universally and individually adjustable mask connection system of the Dräger HPS 7000 creates a strong and safe helmet-mask combination. The full-face mask FPS 7000,

the integrated mask communication unit FPS 7000 COM-PLUS and the SCBA of the PSS series allow you to optimally configure the overall system. The lightweight LED helmet lamp is integrated into the helmet shell and illuminates the whole working area. It is located in the centre of the front plate and has an effective glare

shield as well as intelligent battery management system. The interior fitting can be equipped with various audio/speech headsets for different radios. This ensures reliable communication even in loud environments.

HPS 7000 HELMET LAMP (OPTIONAL)

Integrated 3 W high-performance lamp with LED technology

FRONT PLATE

Matt black or helmet colour, with or without reflective foil and marking

ADAPTER FOR COMMUNICATION SYSTEMS

To connect various communication systems

LAMP HOLDER (OPTIONAL)

To attach an external lamp, on the right/left

HELMET SHELL

Made of high-temperature-resistant composite material

INTERNAL FITTING

Skin-friendly materials, washable

HARNES

Adjustable chin and neck straps with Nomex® padding

Dräger HPS 7000
basic version with facial protection visor and short Nomex® neck protection

Dräger HPS 7000 PRO
with standard front plate with reflective foil and logo, includes protective goggles

Dräger HPS 7000 PRO
with protective goggles, facial protection visor, integrated HPS 7000 helmet lamp and neck protection (dutch version)

FACIAL PROTECTION VISOR

Integrated, clear – anti-scratch or gold-coated as options

PROTECTIVE GOGGLES (ONLY FOR PRO VERSIONS)

Integrated, clear – anti-scratch coated or tinted as options

MASK-HELMET CONNECTION

Adjustable, universal mask receptacle

EYE-PROTECTION LEVER

Operation of the eye-protection visor on both sides

REFLECTIVE STRIPES (OPTIONAL)

Made of flameproof material, silver

ADJUSTMENT WHEEL

Adjust the head size from the outside

NECK-PROTECTION HOLDER

Attach various neck protections via snap system

**HIGHEST SAFETY – THE MATERIAL MIX MAKES THE DIFFERENCE**

Despite its low weight, the Dräger HPS 7000 is one of the safest full-shell helmets in its class. Its outer shell of composite material in combination with the PUR inner shell provides reliable protection against thermal and mechanical influences. The plastic reinforced with fibreglass and aramid webbing resists extreme temperatures. It is even able to withstand the enormous radiation caused by the heat and flame engulfment of a flash over. The visors made of high-temperature-resistant polyether sulphone reliably protect your eyes and face against high heat, particles and liquid chemicals.

NOTHING LEFT TO BE DESIRED

A comprehensive accessory programme completes the Dräger package. Reflective stripes improve your visibility under unfavourable conditions and allow for individual marking. Matched to your clothing, the various neck-protection versions reliably keep your back free. Separate helmet lamps are attached with a lamp adapter on the right or left helmet side. A Nomex® coating protects your helmet in any training situation and extends its service life. Helmet bags and cases provide safe storage and transport.

READY AGAIN IN NO TIME AT ALL

The Dräger HPS 7000 is easy and efficient to service, thanks to the minimum number of components. The entire interior fitting can be removed and reinstalled in just a few steps. You can replace individual components easily and quickly using standard tools. All helmet components are cleaned and disinfected manually or in an industrial washing machine.

OUTSTANDING DESIGN

The firefighter's helmet Dräger HPS 7000 has been awarded two major design awards:

- iF product design award 2014
- red dot design award 2013

Both awards count among the most important international design competitions and not only rate design quality, but also aspects such as safety, ergonomics, functionality, degree of innovation and environmental compatibility.

The red dot jury based its decision on: "The notably light Dräger HPS 7000 firefighter helmet can be customised to comfortably fit any head size and guarantees enhanced safety."

Dräger HPS 7000 PRO
with patented wheel-adjustment system

Dräger HPS 7000 PRO
with neck protection, neck curtain made of Nomex® and external lamp

Accessories

NECK PROTECTION | LAMP | LAMP HOLDER

Thanks to a plug-in system, each form of **neck protection** can be attached quickly and securely.

D-56195-2012		Aluminium/Nomex® Aluminium-coated with back made of Nomex® III	D-56194-2012		Nomex® Short and tight fit, Nomex with fluorocarbon

TECHNICAL DATA

Dräger HPS 7000

Size	Two helmet shell sizes, H1: for head size 52 to 60 and optional for 50/51 (when using a separate padding strip), H2: for head size 56 to 64/66, continuously adjustable via adjustment wheel
Weight	HPS 7000-H1: ca. 1,380 g (±5%) HPS 7000-H2: 1,680 g (±5%) HPS 7000 PRO-H1: ca. 1,580 g (±5%) HPS 7000 PRO-H2: 1,880 g (±5%)
Material, outer shell	Composite consisting of fibreglass-reinforced plastic (PA-GF) and additionally reinforced with aramid webbing, high-temperature-resistant
Colours	See Ordering Information
Mask connection (only for PRO version)	Option to attach any adapter mask, e.g. Dräger FPS 7000, adjustable to four positions
Interior fitting	Flame-resistant and washable 4-point harness made of Nomex®, sweat band of eco-leather, head support ring with wheel-adjustment system (patent pending), integrated comfort hairnet, fixing lever for facial protection visor and communication adapter
Facial protection visor	2.5 mm polyether sulphone, anti-scratch coated (optional), approved acc. to EN 14458:2004 with the options -40°C, T, K, Ω, UV 2-4, IR 4-4 depending on versions: clear, clear with anti-scratch coating or gold-coated
Protective goggles (only for PRO version)	2.5 mm polyether sulphone with softpad edge protection, anti-scratch coated (optional), approved acc. to EN 14458:2004 with the options -40°C, T, K, Ω depending on version: clear or clear with anti-scratch coating, adjustable to two positions
Approvals, helmet	EN 443:2008 (type B 3b, C, E2, E3, -40°C), mask-helmet combination acc. to DIN 58610

Helmet lamp HPS 7000

Material	Fibreglass-reinforced plastic (PA-GF), high-temperature-resistant
Total dimension	Approx. 55 mm wide × 43 mm high × 105 mm long
Weight	With batteries: approx. 125 g, without batteries: approx. 80 g
Light technology	Power LED, lighting level 1: approx. 43 lm, lighting level 2: approx. 25 lm
Power supply	2 AA/LR6/MN1500 alkaline batteries, intelligent battery-management system
Usage time	Lighting level 1: approx. 5 hours, lighting level 2: approx. 11 hours
Protection class	IP 67
Approval HPS 7000 helmet lamp	IECEX: Ex ib IIC T4/T3 Gb ATEX: II 2G Ex ib IIC T4/T3 Gb
