

Product information VOPCROM-solution (Chromic acid solution)

Whether crystalline, flakes or granules: there is always the risk of dust when using solid chromic acid

In addition, there are the specific disadvantages of these forms of delivery

With VOPCROM solution (chromic acid solution), Vopelius Chemie AG has opened up a new dimension of chromic acid.

We offer different concentrations up to 750 g / l chromic acid.

In accordance with the applicable regulations transport is made in 1,000 L IBC or road tankers.

We guarantee consistently high product quality.

- **Homogeneous and consistent product quality**
- **Quality control with certificate of analysis for each production batch**
- **easy handling (simple addition calculation)**
- **automatic dosage during active production**
- **No plants stop and therefore no loss of production**
- **Absolutely dust-free addition and therefore no risk for employees and environment**
- **best mixing properties of the solution**
- **less requirements, since as not oxidizing classified**
- **Saving cleaning and disposal costs of packaging**
