

ESP

TOP LOADING WASHING MACHINES

Everest Electromechanic ESP series are designed to efficient cleaning to industrial parts with pressured hot water and bio-degradable detergents. These machines have very low operating cost and economic prices. They have corrosion free stainless steel and heavy duty components. These machines are right choose for cleaning oil, Grease, production particules on the surface of the parts and antitrust protection.

- Stainless Steel construction
- Stainless steel basket
- Steam Extraction Pipe
- Interlock Lid safety control
- Emergency Stop
- Stainless Steel Control Pannel
- Stainless Steel Heater
- Stainless Steel pump rezistant to high temperature and chemicals.
- Stainless steel partical filter top of the tank
- Stainless Steel filter on the suction of the pump.
- Oil skimmer (Optional)
- Stainless steel nozzles pipe
- Stainless steel nozzles

ESP SERIES TECHNICAL DETAILS

	ESP - 60	ESP - 82	ESP - 105	ESP - 125
Height (mm)	1060	1170	1300	1500
Length (mm)	945	1150	1420	1650
Width (mm)	755	950	1220	1470
Loading Height (mm) (with loading car)	350	400	500	640
Loading Height (mm) (without loading car)	310	360	460	600
Heating Power (kw)	4,5	4,5	6	12
Basket Diemeter (mm)	600	820	1050	1250
Max. Loading Weight (kg)	80	150	200	300
Tank Capacities (lt)	60	120	250	480
Pump Rate (lt/min)	60	120	170	220
Spray Pressure (bar)	1,8	2,4	3,2	3,5
Timer Control (min) (Analog / Digital)	0-60/0-99	0-60/0-99	0-60/0-99	0-60/0-99
Thermostat Control (°C)	0-90	0-90	0-90	0-90
Total Power (kw)	6	7	9	16
